### ADDENDUM TO FAR 52.212-4

#### **FAR 52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)**

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

<http://farsite.hill.af.mil>

[www.usda.gov/procurement/policy/agar.html](http://www.usda.gov/procurement/policy/agar.html)

#### FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1) CLAUSES

- 52.223-2 Affirmative Procurement of Biobased Products Under Service and Construction Contracts (Sep 2013)
- 52.232-40 Providing Accelerated Payments to Small Business Subcontractors
- 52.236-5 Material and Workmanship (APR 1984)
- 52.236-9 Protection of Existing Vegetation, Structures, Equipment, Utilities, and Improvements (APR 1984)
- 52.242-14 Suspension of Work Order (APR 1984)

(End of Clause)

#### **DESIGNATION OF CONTRACTING OFFICER'S REPRESENTATIVE**

The Contracting Officer designates the Contracting Officer's Representative (COR).

The COR is responsible for administering the performance of work under this contract. In no event, however, will any understanding, agreement, modification, change order, or other matter deviating from the terms of this contract be effective or binding upon the Government unless formalized by proper contractual documents executed by the Contracting Officer prior to completion of the contract.

The Contracting Officer should be informed as soon as possible of any actions or inactions by the Contractor or the Government, which will change the required delivery or completion times stated in the contract, and the contract will be modified accordingly. (This does not apply to individual task assignments which were issued by the COR provided they do not affect the delivery schedule or performance period stated in the contract.)

On all matters that pertain to the contract terms the Contractor must communicate with the Contracting Officer. Whenever, in the opinion of the Contractor, the COR requests effort outside the scope of the contract, the Contractor should so advise the COR. If the COR persists and there still exists a disagreement as to proper contractual coverage, the Contracting Officer should be notified immediately, preferably in writing if time permits. Proceeding with work without proper contractual coverage could result in nonpayment or necessitate submittal of a contract claim.

(End of Clause)

**FAR 52.236-6 SUPERINTENDENCE BY THE CONTRACTOR (APR 1984)**

At all times during performance of this contract and until the work is completed and accepted, the Contractor shall directly superintend the work or assign and have on the worksite a competent superintendent who is satisfactory to the Contracting Officer and has authority to act for the Contractor.

(End of Clause)

**CONTRACTOR'S REPRESENTATIVE**

The Government may, at its option, suspend work with full count of contract time continuing, if the Contractor fails to provide a Contractor's Representative (1) conversant in the English language and (2) able to read and understand the contract.

(End of Clause)

**NOTIFICATION OF SUBCONTRACTING**

The Contractor shall promptly notify the Contracting Officer upon entering into any subcontract arrangement. The notification shall include as a minimum:

1. The name, address, telephone number and DUNS number of the subcontractor.
2. The date upon which the subcontract was entered into and its duration.
3. A detailed description of the work being subcontracted including a listing of contract items, units, etc., as appropriate.

(End of clause)

**SUSPENSIONS OF WORK FOR OTHER THAN GOVERNMENT'S CONVENIENCE**

The Contracting Officer may issue orders to suspend the work wholly or in part for such period of time as deemed necessary because of: (1) weather or ground conditions when further prosecution of the work might cause environmental or resource damage to the project, access roads to the project, or adjacent property. Such action would include but not be limited to instances such as, damage to access roads, rutting of project roads which causes otherwise suitable soils to be muddy or unsuitable; or (2) failure of the Contractor to comply with specifications such as but not limited to placement of chemical sprays in areas other than those specified, performing work prior to prerequisite approvals, operating equipment not meeting fire requirements, or when conditions exist which do not meet safety requirements. Whether or not a suspend work notice is issued, the Contractor shall be responsible for correcting any damage caused by its operation, whether inside or outside project limits, at no cost to the Government. Such suspensions shall not be considered as suspensions for the Convenience of the Government under FAR 52.242-14, Suspension of Work, and shall not qualify for an equitable adjustment.

(End of clause)

**USE OF PREMISES**

a. The Contractor shall comply with the regulations governing the operation of premises that are occupied and shall perform its contract in such a manner as not to interrupt or interfere with the conduct of Government business.

b. Before any camp is opened or operated on National Forest land or lands administered by the Forest Service, the Contractor shall request permission (in writing) from the COR. A camp is interpreted to include the campsite or trailer parking area of any employee working on the project for the Contractor. If permission is granted, a camping permit will be issued.

c. It is further stipulated that in addition to clean up of any campsites, the Contractor shall remove its equipment from National Forest land before final acceptance and payment of the project.

(End of clause)

#### **AGAR 452.236-73 ARCHAEOLOGICAL OR HISTORIC SITES (FEB 1988)**

(End of clause)

#### **LANDSCAPE PRESERVATION**

The Contractor shall give attention to the effect of contract operation upon the landscape, shall take care to maintain natural surroundings undamaged, and shall conduct the work at all times in compliance with the following requirements:

a. Prevention of the Landscape Defacement. The Contractor shall not remove, deface, injure, or destroy trees, shrubs, lawns, or natural features unless specifically authorized by the Government. Unless otherwise provided, the Contractor shall confine contract operations to within the areas designated in contract documents. Unless otherwise provided in this contract, the Contractor shall gather rock, which falls outside the roadway due to contract operations and dispose of it as directed, by the Government.

b. Protection of Streams, Lakes, and Reservoirs. The Contractor shall take sufficient precautions to prevent pollution of streams, lakes, small ponds, and reservoirs with fuels, oils, bitumen, dust palliatives, silt, or other harmful materials. Mechanical equipment shall not be operated in live streams without written approval of the Government. If a petroleum spill should take place in the water, the Contractor shall immediately notify the COR and the Oregon Emergency Response System (OERS), telephone 1-800-452-0311 or 1-503-378-4124.

(End of clause)

Actions taken under this paragraph shall be subject to the Suspension of Work clause, FAR 52.242-14.

(End of clause)

#### **PROPERTY AND PERSONAL DAMAGE**

a. The Contractor shall use every precaution necessary to prevent damage to public and private property. Land monuments and property markers shall not be disturbed until the Contracting Officer, or his/her representative, has witnessed or otherwise referenced their location and directed their removal.

b. The Contractor shall be responsible for all damage to property and to persons, including third parties, that occur as a result of his/her agent's or employee's fault or negligence. The term "third parties" is construed to include employees of the government.

(End of clause)

### **PUBLIC OFFICIALS NOT PERSONALLY LIABLE**

There shall be no personal liability upon the Contracting Officer or officer in charge, their agents or employees, for any act performed in the discharge of any duty imposed or the exercise of any power or authority conferred upon them, by, or with the scope of the contract, it being understood that in all such matters they act solely as agents and representatives of the Government.

(End of clause)

### **TRASH AND REFUSE MATERIAL**

Contractor shall remove all of its own trash and refuse from the contract area. Material to be removed includes, but is not limited to: chemical containers, used engine oil, oil filters, oil cans, grease cartridges, camp refuse such as tin cans, paper garbage, etc. All placement of sanitary facilities will require prior approval of the Contracting Officer.

(End of clause)

### **STORAGE OF MATERIALS AND EQUIPMENT**

All storage sites approved by the Government shall be restored to a satisfactory condition at the Contractor's expense.

(End of clause)

### **POTENTIAL SAFETY HAZARDS**

(a) Data and information furnished or referred to below is for the Contractor's information. (End of clause)

### **Description/Specifications/Statement of Work - Terwilliger Fire - Danger Tree Felling and Extraction**

#### **Scope**

Danger Trees on suppression fire lines are throughout the fire perimeter on a variety of complex terrain that requires specialized equipment to perform the work in a safe and efficient manner. Roads vary from main paved roads with no shoulder and parallels rivers to standard level 2 forest roads with surface rock and native surfaces. Terrain varies from flat and rolling to steep and rocky with deep drainages. Work to be performed includes, but is not limited to directional felling of trees, skidding of trees, processing of trees, decking of logs, and piling of slash. Due to the large number of danger trees along these roads and complexity of terrain, orderly operations will be necessary to facilitate a challenging task in a safe manner. Forest Service personnel will provide plans in mitigating hazards from the fire and guidance to ensure resource protections are in place. Forest Service will also provide a guide for identifying danger trees that shall be followed. Additional guidance will be provided throughout the life of the contract. Resource concerns will be identified on the ground and made known so avoidance and protection occurs.

#### **Daily Work**

Pre-operational briefings will be conducted approximately every three days by the Contracting Officer Representative (COR). It's anticipated that work plans and maps will likely be provide and updated approximately every three days. The pre-operational briefing will include standards for performing work.

The Contractor shall be responsible for all logistical support (e.g. fueling, chase truck, etc.) of the Contractor's resources throughout the life of this contract. Each day is based on a 10.5 hour operational shift, from 7:00 AM to 5:30 PM, with a one hour lunch break. Actual operational hours (e.g. start/end time, etc.) may be adjusted if mutually agreed upon between CO and Contractor.

#### **Contract Time & Payment**

There is no guarantee of full-time work for the entire 30 days shown in the Schedule of Items. There may be non-working days in the performance period. **If a piece of equipment/person is not working for that day, no payment will be made for that equipment/person.** Payment will not be made for hours/time when equipment is broken down and not operational. If operations are suspended by the Forest Service while work is in progress due to unfavorable weather and soil conditions, the contractor shall be paid the full daily rate for that day. Any planned full day work suspension will be paid at the rates shown in the Schedule of Items (full daily rate, or reduced rate if applicable. the lower of the two will apply).

#### **Pay Item No. 12 - Transport (lowboy)**

The transport vehicle will be used to transport equipment to areas of work throughout the fire area. Transport vehicle may be needed to transport equipment from one road to the next, especially if pavement doesn't allow for walking equipment, or if roads are too far apart. Transport vehicles will only be on an as needed basis.

A transport may not be needed for the first portion of work, since the first area of work is confined to one location where heavy equipment can easily “walk” to various work sites as needed. The Forest Service will provide approximately two days of notice before a transport is needed. Payment will be made at the daily rate shown in the Schedule of Items for each day a transport is retained, or used.

### **Work Location**

Willamette National Forest  
Terwilliger Fire

### **Equipment Needed**

Due to the varied complexities of this work, a multitude of equipment is needed to be successful. Rubber tired machines are needed to work on pavement, skidders with cable line is needed for hand felled trees on steep slopes where trees are hung up. Shovels are needed to be able to reach on tall cut banks above roads and fully suspend trees in resource sensitive areas. The following describes specific needs and equipment capabilities to successfully perform this work:

Harvester and Feller-Buncher will need to be able to cut and process danger trees on broken and rocky terrain. Harvester and Feller-Buncher operators will need to identify and directionally fell danger trees per felling specifications provided by the Forest Service.

Danger Tree identification specs will be in Designation by Prescription form, prescribing a desired outcome based off specific fire and physical damage. Forest Service personnel will be available to monitor this identification process. Felling to lead for safe and efficient tree removal as well as contour felling in resource sensitive areas will be required. Felling trees up to 20” and possibly greater is needed.

Bunching trees to facilitate efficient skidding/forwarding and reducing soil impacts is required. Grousers will need to be removed from the rubber tires to allow for traveling over paved roads.

Forwarders will need to fully suspend trees and logs from the point of felling to deck locations identified by the Forest Service. Grousers will need to be removed from the rubber tires to allow for traveling over paved roads.

Skidders will skid logs from point of felling or bunching to decks identified by the Forest Service. Skidders shall stay on routes that will reduce soil impacts as much as possible. Cable line may need to be pulled from the skidders to retrieve logs on steep ground. Tire chains may need to be removed for traveling over pavement.

Processors will need to delimb and buck trees to preferred lengths identified by the Forest Service. Slash shall be managed in a way to allow for safe and clean piling. Processors may be working with a Shovel for sorting and decking, however, if a shovel is not available at the time of processing, the processor is expected to sort and deck as best as possible.

Shovels will need to retrieve trees off cut banks and bunch trees on roads to facilitate safe and efficient skidding. Shovel logging certain areas may be required. Shovels may be needed to sit at the landing and neatly sort and deck logs by species, length and product as specified by the

Forest Service. Shovels may need to fully suspend logs out of resource sensitive areas to protect resources of concern. Slash piling shall occur as directed by Forest Service. Piles shall be reasonable free of dirt and debris, using a lift and stack method to facilitate burning.

Skyline Yarding with a Yarder, or a Yoader may be the method that is most efficient and least impactful to Forest Resources in some situations. Yarders shall be capable of yarding trees up to 300 feet with leading end suspension.

Hand fellers will need to identify and directionally fell danger trees per felling specifications provided by the Forest Service. Danger Tree identification specs will be in Designation by Prescription form, prescribing a desired outcome based off specific fire and physical damage. Forest Service personnel will be available to monitor this identification process. Felling to lead for safe and efficient tree removal as well as contour felling in resource sensitive areas will be required. Felling on varied terrain will occur, including steep and rocky ground. Some limited limbing and bucking may be necessary.

Log Trucks may be used to haul logs at decked location to a centrally located staging area. The Log trucks will be requested on an “as needed basis” with the Forest Service providing approximately 2 days advance notice.

All equipment shall work together in a workmanlike and orderly fashion to provide for a safe, efficient, and respectful working environment. Work will be performed in a fire environment and will adhere to safety standards set by the Forest Service, including communications for firefighter personnel. Contractors are not required to be “red carded” for working on a fire. The work location is virtually free of fire, but some areas do have some activity.

Communication of any discrepancy shall be relayed to Forest Service personnel including the COR and Contracting Officer.

### **Definitions**

Cable yarding - except that gravity operated logging systems employing non-motorized carriages may be operated between the hours of 8 p.m. and 1 p.m., local time, when all block and moving lines, except the line between the carriage and the chokers, are suspended 10 feet above the ground;

Power saws - except power saws may be used at loading sites and on tractor/skidder operations between the hours of 8 p.m. and 1 p.m., local time.

In addition, the following are permitted between the hours of 8 p.m. and 1 p.m., local time:

- a. tractor/skidder operations;
- b. mechanized loading and hauling of any product or material;
- c. blasting;
- d. welding or cutting of metal;
- e. any other spark-emitting operation not specifically mentioned.

IV. General shutdown - All operations are prohibited.

The following definitions shall apply to these Industrial Fire Precaution Levels:

Cable yarding systems: A yarding system employing cables and winches in a fixed position.

Closed season (Fire Precautionary Period): That season of the year when a fire hazard exists as declared by the responsible agency official.

Contracting Officer: The person executing the contract, permit or license on behalf of the Government and includes that person's designated representative, acting within the limits of their authority or the duly appointed successor to the individuals.

Loading sites/woods site/project area: A place where any product or material (including but not limited to logs, firewood, slash, soil, rock, poles, posts, etc.) is placed in or upon a truck or other vehicle.

Low hazard area: Means any area where the responsible agency representative (WDNR, ORF, BIA, BLM) determines the combination of elements reduces the probability of fire starting and/or spreading.

Tractor/skidder operations: include a harvesting operation, or portion of a harvesting operation, where tractors, skidders, or other harvesting equipment capable of constructing fireline, are actively yarding forest products and can quickly reach and effectively attack a fire start.

Waivers, written in advance, may be used for any and all activities. Activities for which waivers may be issued include, but are not limited to:

- a. mechanized loading and hauling;
- b. road maintenance such as sprinkling, graveling, grading and paving;
- c. cable yarding using gravity systems or suspended lines and blocks, or other yarding systems where extra prevention measures will significantly reduce the risk of fire;
- d. powers saws at loading sites or in felling and bucking where extra prevention measures will significantly reduce the risk of fire;
- e. maintenance of equipment (other than metal cutting and welding) or improvements such as structures, fences and powerlines.

Such waiver, or substitute precautions will prescribe measures to be taken by the Contractor to reduce the risk of ignition, and/or the spread of fire. The Contracting Officer shall consider site specific weather factors, fuel conditions, and specific operations that result in less risk of fire ignition and/or spread than contemplated when precaution level was predicted. Consideration shall also be given to measures that reduce the precaution levels above. The Contractor shall assure that all conditions of such waivers or substitute precautions are met.

The Contractor shall obtain the predicted Industrial Fire Precaution Level daily, prior to the start of work, from the appropriate Ranger District headquarters. If predictions made after 6:00 p.m., local time, are significantly different than the original prediction, the Forest Service will inform the Contractor when changes in restrictions or industrial precautions are made.

**NOTE:** The IFPL system does not apply on lands protected by ODF east of the summit of the Cascades.

Where hauling involves transit through more than one shutdown/regulated use area, the precaution level at the woods loading site shall govern the level of haul restriction, unless otherwise prohibited by other than industrial precaution level system.

## 8. Fire Tools

The Contractor shall furnish serviceable fire fighting tools in a readily accessible fire tool box or compartment of sound construction with a hinged lid and hasp so arranged that the

box can be secured or sealed. The box shall be red and marked "Fire Tools" in letters one inch high. It shall contain a minimum of:

a.2 axes or Pulaskis with a 32-inch handle;

b.3 adze eye hoes. One Pulaski may be substituted for 1 adze eye hoe;

c.3 long-handled, round point shovels, size "0" or larger.

#### 9. Fire Security

When the Industrial Fire Precautions Level is "I" or higher, unless a waiver is granted, the Contractor shall designate a person who shall perform fire security services listed below on the project area and vicinity. The designated person shall be capable of operating the Contractor's communications and fire fighting equipment specified in the contract, excluding helicopters, and of directing the activities of the Contractor's personnel on forest fires. In lieu of having the designated person perform the required supervisory duties, the Contractor may provide another person meeting the qualifications stated above to direct the activities of Contractor's personnel and equipment during all fire fighting activities.

Services described shall be for at least 1 hour from the time the Contractor's operations are shut down. For the purposes of this provision, personnel servicing equipment, and their vehicles, who are not engaged in cutting or welding metal are excluded.

Fire security services shall consist of moving throughout the operation area or areas constantly looking, reporting, and taking suppression action on any fires detected. Where possible, the designated person shall observe inaccessible portions of helicopter operating areas from vantage points within or adjacent to project area.

#### 10. Blasting

Whenever the Industrial Fire Precaution Level is "II" or greater, a fire security person equipped with a long-handled, round point, No. "0" or larger, shovel, and a five-gallon backpack pump can filled with water will stay at location of blast for 1 hour after blasting is done. Blasting may be suspended by Forest Service in writing, in an area of high rate of spread and resistance to control.

Fuses shall not be used for blasting. Explosive cords shall not be used without written permission of Forest Service, which may specify conditions under which such explosives may be used and precautions to be taken.

ALL OCCUPATIONS LISTED ABOVE RECEIVE THE FOLLOWING BENEFITS:

HEALTH & WELFARE: \$4.48 per hour or \$179.20 per week or \$776.53 per month

HEALTH & WELFARE EO 13706: \$4.18 per hour, or \$167.20 per week, or \$724.53 per month\*

\*This rate is to be used only when compensating employees for performance on an SCA-covered contract also covered by EO 13706, Establishing Paid Sick Leave for Federal Contractors. A contractor may not receive credit toward its SCA obligations for any paid sick leave provided pursuant to EO 13706.

VACATION: 2 weeks paid vacation after 1 year of service with a contractor or successor; and 3 weeks after 10 years. Length of service includes the whole span of continuous service with the present contractor or successor, wherever employed, and with the predecessor contractors in the performance of similar work at the same Federal facility. (Reg. 29 CFR 4.173)

HOLIDAYS: A minimum of ten paid holidays per year: New Year's Day, Martin Luther King Jr.'s Birthday, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day. (A contractor may substitute for any of the named holidays another day off with pay in accordance with a plan communicated to the employees involved.) (See 29 CFR 4.174)

**\*\* UNIFORM ALLOWANCE \*\***

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract, by the employer, by the state or local law, etc.), the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition, where uniform cleaning and maintenance is made the responsibility of the employee, all contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual cost), reimburse all employees for such cleaning and maintenance at a rate of \$3.35 per week (or \$.67 cents per day). However, in those instances where the uniforms furnished are made of "wash and wear" materials, may be routinely washed and dried with other personal garments, and do not require any special treatment such as dry cleaning, daily washing, or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract, by the contractor, by law, or by the nature of the work, there is no requirement that employees be reimbursed for uniform maintenance costs.

**\*\* NOTES APPLYING TO THIS WAGE DETERMINATION \*\***

Under the policy and guidance contained in All Agency Memorandum No. 159, the Wage and Hour Division does not recognize, for section 4(c) purposes, prospective wage rates and fringe benefit provisions that are effective only upon such contingencies as "approval of Wage and Hour, issuance of a wage determination, incorporation of the wage determination in the contract, adjusting the contract price, etc." (The relevant CBA section) in the collective bargaining agreement between (the parties) contains contingency language that Wage and Hour does not recognize as reflecting "arm's length negotiation" under section 4(c) of the Act and 29 C.F.R. 5.11(a) of the regulations. This wage determination therefore reflects the actual CBA wage rates and fringe benefits paid under the predecessor contract.

**\*\* SERVICE CONTRACT ACT DIRECTORY OF OCCUPATIONS \*\***

The duties of employees under job titles listed are those described in the "Service Contract Act Directory of Occupations", Fifth Edition (Revision 1), dated September 2015, unless otherwise indicated.

REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE  
Standard Form 1444 (SF-1444)

**Conformance Process:**

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), be classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination. Such conformed classes of employees shall be paid the monetary wages and furnished the fringe benefits as are determined (See 29 CFR 4.6(b)(2)(i)). Such conforming procedures shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees (See 29 CFR 4.6(b)(2)(ii)). The Wage and Hour Division shall make a final determination of conformed classification, wage rate, and/or fringe benefits which shall be retroactive to the commencement date of the contract (See 29 CFR 4.6(b)(2)(iv)(C)(vi)). When multiple wage determinations are included in a contract, a separate SF-1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

1) When preparing the bid, the contractor identifies the need for a conformed occupation(s) and computes a proposed rate(s).

2) After contract award, the contractor prepares a written report listing in order the proposed classification title(s), a Federal grade equivalency (FGE) for each proposed classification(s), job description(s), and rationale for proposed wage rate(s), including information regarding the agreement or disagreement of the authorized representative of the employees involved, or where there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.

3) The contracting officer reviews the proposed action and promptly submits a report of the action, together with the agency's recommendations and pertinent information including the position of the contractor and the employees, to the Wage and Hour Division, U.S. Department of Labor, for review (See 29 CFR 4.6(b)(2)(ii)).

4) Within 30 days of receipt, the Wage and Hour Division approves, modifies, or disapproves the action via transmittal to the agency contracting officer, or notifies the contracting officer that additional time will be required to process the request.

5) The contracting officer transmits the Wage and Hour decision to the contractor.

6) The contractor informs the affected employees.

Information required by the Regulations must be submitted on SF-1444 or bond paper.

When preparing a conformance request, the "Service Contract Act Directory of Occupations" (the Directory) should be used to compare job definitions to ensure that duties requested are not performed by a classification already listed in the wage determination. Remember, it is not the job title, but the required tasks that determine whether a class is included in an established wage determination. Conformances may not be used to artificially split, combine, or subdivide classifications listed in the wage determination.

(h) *Certification Regarding Responsibility Matters (Executive Order 12689)*. (Applies only if the contract value is expected to exceed the simplified acquisition threshold.) The offeror certifies, to the best of its knowledge and belief, that the offeror and/or any of its principals—

(1) ☐ Are, ☐ are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2) ☐ Have, ☐ have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(3) ☐ Are, ☐ are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h)(2) of this clause; and

(4) ☐ Have, ☐ have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds \$3,500 for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) *The tax liability is finally determined*. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) *The taxpayer is delinquent in making payment*. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) *Examples*.

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. §6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. §6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. §6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. §362 (the Bankruptcy Code).

(iv) The compensation (wage and fringe benefits) plan for all service employees performing work under the contract is the same as that used for these employees and equivalent employees servicing commercial customers.

(3) If paragraph (k)(1) or (k)(2) of this clause applies—

(i) If the offeror does not certify to the conditions in paragraph (k)(1) or (k)(2) and the Contracting Officer did not attach a Service Contract Labor Standards wage determination to the solicitation, the offeror shall notify the Contracting Officer as soon as possible; and

(ii) The Contracting Officer may not make an award to the offeror if the offeror fails to execute the certification in paragraph (k)(1) or (k)(2) of this clause or to contact the Contracting Officer as required in paragraph (k)(3)(i) of this clause.
